

Beth Tieman is an Assistant Professor at [Georgia State University](#) and has been a pediatric physical therapist since 1995, with experience in Early Intervention and School-based settings. She received her PhD from Drexel University in 2002 where she met the co-investigators of the current Move and PLAY study. Her research interests focus on mobility methods of children with cerebral palsy. She is currently working on a qualitative research project exploring parental perspectives of mobility in children with cerebral palsy. Beth Tieman is on the faculty at Georgia State University, Division of Physical Therapy where she teaches the pediatric content. In her "spare" time, she is a mother to three young children (under age 5)!
