

Sarah (Sally) Westcott McCoy, PT, PhD (westcs@u.washington.edu) has recently accepted a position as an Associate Professor in the Department of Rehabilitation Medicine, Division of Physical Therapy at the [University of Washington](http://www.washington.edu), Seattle, WA. She is responsible for the instruction to DPT students related to pediatric clinical practice and will be involved with the Departmental Interdisciplinary PhD program. She will also pursue ongoing research endeavours. She has been involved in pediatric physical therapy working clinically in various settings (EI, schools, private practices) and parts of the country (east and west coasts of US) for the last 29 years. Some years of practice were spent in academic settings including the University of Puget Sound, Tacoma, WA, Drexel University, Philadelphia, PA, and the University of Washington, Seattle, WA. She completed a doctorate in Behavioral Neuroscience at University of Washington in 1993. Her clinical research has focused on the assessment and intervention of children with postural control or balancing ability dysfunction focusing on children with cerebral palsy and children with developmental coordination disorder. She has presented many studies at national and international meetings and published work in several journals related to physical therapy, including projects of her own and collaborative studies with past students.
