CHILD HEALTH CONDITIONS QUESTIONNAIRE

Description: The Child’s Health Conditions Questionnaire is a self-report measure to be completed by parents to describe the number and impact of health conditions on daily life.

Instructions for Parents: Children’s development can be affected by the health problems that they experience. For each of the 16 health conditions in the chart below, first indicate ‘yes’ or ‘no’ depending on whether or not your child has the specified problem. If your child has a health problem, please indicate to what extent the health condition affects your child’s daily activities.

Responses for this question are:
